ELECTION

Dear Sir:

In view of the restriction requirement mailed January 12, 2005, Applicant elects to prosecute the species A1 and B1. Applicant agrees with the Examiner that claims 60-63, 65-75 and 80-89 are readable on this species. Applicant further agrees that, at least claim 60 is generic.

Applicant further notes for the record that a particular method could be within more than one species. For example, a top electrode could be formed from both a semiconductor (B1) and a metal silicide (B4). This method would read on both claim 75, which is elected, and also claim 78, which is not elected, assuming, of course, that the other claim limitations are met.

Respectfully submitted,

Steven H. Slater
Attorney for Applicant
Reg. No. 35,361
